## Environmental Policy

---

In the undertaking of their daily duties, it is a realisation that all staff and volunteers associated with AC will have an influence on the environment. We will commit to adopting working practises that will help to have a positive effect, assist towards continued environmental improvement, prevent pollution and reduce unavoidable negative influences caused by AC activities

This environmental policy covers all aspects of our operation. In particular AC will :

- reduce the amount of waste generated by reusing and recycling where possible
- recognise the procurement and use of products/services which have minimal environmental and social impact
- use energy and water in an efficient way.
- reduce the impact of vehicle emissions by encouraging the application of sustainable principles of travelling and arranging meetings
- provide training/advice and regularly update staff on issues to encourage good environmental practice
- ensure full compliance with environmental legislation relevant to the organisation's activities
- ensure organisations we associate with are aware of our policies and to encourage them to develop their own good environmental practices

The AC Board will ensure this policy is maintained and implemented. It is the responsibility of all employees, volunteers, visitors and contractors to fully support this policy through their active co-operation and participation.
